QUEEN NITOCRIS OF THE SIXTH DYNASTY

By PERCY E. NEWBERRY

Nitocris, the famous queen of Egypt, is mentioned by Herodotus, Eratosthenes, and Manetho; at the time of the Roman Emperors she appears as one of the old heroines of the country. Placed by Manetho at the end of his Sixth Dynasty, she is described by him as of fair complexion and the bravest and most beautiful woman of her time. He adds that she was said to have built the Third Pyramid and reigned twelve years. Eratosthenes gives the length of her reign as six years and remarks that her name means Ἀθηνᾶ νικήφορος, 'Athena the victorious'. Herodotus records that 'after Menes came 330 kings whose names the priests recited from a papyrus roll. In all these generations were eighteen Ethiopian kings and one queen, a native of the country; the rest were all Egyptian men. The name of the queen was the same as that of the Babylonian princess Nitocris. The Greek historian continues: 'To avenge her brother (he was king of Egypt and was slain by his subjects who then gave Nitocris the sovereignty) she put many Egyptians to death by guile. She built a spacious underground chamber; then, with the pretence of handselling it, but with far other intent in her mind, she gave a great feast, inviting those Egyptians whom she knew to have been most concerned in her brother's murder; and, while they feasted, she let the river in upon them by a great secret channel. This was all that the priests told of her, save that when she had done this, she cast herself into a chamber full of hot ashes, thereby to escape vengeance.' In the light of our present knowledge it is not possible to say whether there is any truth in these details of the queen's life, but it is remarkable that some modern historians have declared Nitocris to be a king and that others have regarded her as an entirely mythical personage.

The earliest authority for the name of this Sixth Dynasty queen is the Royal Papyrus of Turin, where it is written Nitriṣr. Hincks, in 1846, had suspected Nitocris to be a king and that others have regarded her as an entirely mythical personage.

1 H., 100.
2 Waddell, Manetho (Loeb Classical Series), London, 1940, p. 221.
5 The Babylonian princess was Nitocris (Hdt., I, 185–8), probably a daughter of a Saite king. Hdt., iii, 1 also mentions a daughter of Apries named Nitetis ('Neith is come'), 'a very tall and fair damsel', sent by Amasis to Cambyses.
6 Stern, ZAS, xxiii, 92.
7 H. R. Hall (JHS xxiv [1904], 213) wrote: 'it seems to me that we must abolish the Nitocris of the VIth Dynasty, who is a mere theory of Manetho's'. Cf. the same writer in CAH i (1925), 296, where he says 'the successors of Pepi II were entirely ephemeral and are only interesting because one of them, Neterkere, appears, though a man, to be the original of the Nitocris of Herodotus: Manetho accepts the identification and speaks of a queen in this place. Neterkere was followed by Menkere and the similarity of his name to that of Menkaure led to the association of Neterkere (confused with the Saite queen's name Neitakrit, i.e. "Nitocris") with the Third Pyramid of Gizeh.'
8 Ranke, Die ägyptischen Personennamen, 1935, p. 181, gives no example of the name of earlier date than Dyn. XXVI, but Petrie found a statuette of a Queen Nitocris dated to the reign of Ammenemes III (Gardiner-Peet, Inscriptions of Sinai, pl. 29, No. 98). The name suggests a Saite origin. It was a princess Nitocris who, as daughter of Psammetichus I, was sent from the palace at Sais to Thebes, where she was installed as High Priestess and wife of the god Amun. In earlier times the queens of Menes and Djet (both of Dyn. I) bore names compounded with Neith: Nitηθετ and Merteith respectively; these queens were certainly princesses of the north-western Delta.
9 Trans. Royal Soc. of Literature, Second Series, iii (1850), 129 ff. Hincks's paper was read 12 March 1846.
that Fragment 43 of the papyrus on which the name appears should be attached to Frag. 59, and placed nearly where Frag. 53 stands in Wilkinson's facsimile of the papyrus, for he had recognized that although the names of the kings are destroyed in the uppermost part of Col. V, the lengths of their reigns are preserved, and that as the last two numbers read 'ninety years' and 'one year', they must apply to those of King Phiops and Menthesuphis, which, in the lists of Manetho and Eratosthenes, have that marked difference of duration. In the recent reconstruction of the papyrus made by Dr. Ibscher, Frag. 43 is placed two lines lower down in Col. V than in Wilkinson's facsimile, and gives room for three names, now destroyed, between Menthesuphis and Nitocris. Adding the years on Frag. 61, the entries on Frag. 43 now read:

(1) $\text{\(\text{N}t\text{o}\text{c}\text{r}\text{i}\text{s}\), 2 years, 1 month, 1 day.}$

(2) $\text{\(\text{N}e\text{f}\text{e}\text{r}\text{k}\text{a\ the\ child\), 4 years, 2 months, 1 day.}}$

(3) $\text{\(\text{N}e\text{f}\text{e}\text{r\), 2 years, 1 month, 1 day.}}$

(4) $\text{\(\text{I}b\), 1 year, 8 days.}$

This list was followed by a summary of the number of kings comprising Manetho's Sixth Dynasty and the sum total of years (181) of the Dynasty. If Ibscher's reconstruction is correct, the number of kings will have been thirteen.

The Abydus List of Kings gives as the immediate successors of Pepy I the following:

```
37. 38. 39. 40. 41. 42.
```

The Śaṅkārah List records only four names of Sixth Dynasty kings, Teti, Pepy I, Merenrē, and Neferkarē (Pepy II). Of the three royal names after Nitocris in the Turin List, the first, Neferka 'the child', perhaps corresponds to the Neferkarē of the Abydus List placed after Menkarē near the last of the names included in the Sixth Dynasty. The second, Nefer, may be a scribal error for Negarsahor, who is known from an inscription at Ḥetnub and from graffiti at Toma in Nubia. The last name is 'Ib whose pyramid has been discovered by the Swiss Egyptologist Jéquier among the Pepy II group at Śakārah. 'Ib's pyramid is situated near that of Neith, a queen of Pepy II, and although she bears only the simple name of the Saite goddess in

---

3 Dr. Gardiner has kindly told me that in his transcription made many years ago the supposed $\equiv$ in Wilkinson's facsimile is really $\equiv$ and so is either $\equiv$ or $\equiv$.

4 Anthes, *Die Felseninschriften von Ḥatnub*, Leipzig, 1828, pl. 4, with p. 13. Nearby in the quarry are graffiti of Pepy I, Merenrē, and Pepy II.

5 Weigall, *Antiquities of Lower Nubia*, Oxford, 1907, pl. 56 and 58. There is also a block of alabaster with the king's name in University College, London (figured in Petrie, *History of Egypt*, 1, 1923 [revised], p. 125, fig. 77).

7 Id., *Les Pyramides des Reines Neit et Apouti*, Cairo, 1933.
all the inscriptions of her tomb, she is, I suggest, the original of the famous Nitocris 'Neith is excellent'. Some sixty years ago Petrie¹ touched on the problem of the Third Pyramid and Nitocris. 'The evidence of Manetho', he wrote, 'is not quite certain in the mere extracts that we possess; he only mentions that Nitocris built "the Third Pyramid" without saying where it was; and it is only a presumption that it refers to the same group as "the largest pyramid", which he mentions twenty reigns earlier. It might have referred in the full original text to one of the Sakkara groups, where we should naturally look for works of the sixth dynasty.' It may be noted here that Diodorus Siculus,² though fully aware that the three pyramids at Gizah were erected by Cheops (Cheops), Chephren, and Mycerinus, reports a story current in his time that they were built by Armaeus,³ Amasis, and Inaros;⁴ there is some doubt as to who the first king was, but Amasis and Inaros were definitely Saite kings and it is known that the sovereigns of the Twenty-sixth Dynasty were buried within the precincts of the temple of Neith at Sais.⁵ It follows, therefore, that this story given by Diodorus must refer, not to the Gizah pyramids, but to a series of royal tombs at Sais.

Among the titles of Queen Neith are the following:

1) Eldest King's-Daughter of Meryre³ of the Mennefer pyramid.

2) Hereditary Princess . . . of Merenre³ of the Kha-nefer pyramid.

3) Hereditary Princess, King's-Wife of Neferkare³ of the Men'ankh pyramid.

Nitocris was therefore the eldest daughter of Pepy I, and accordingly sister or half-sister of Merenre⁶ and Pepy II. She had probably married Merenre⁶ and, after his decease, the infant Pepy II, when she would have become the virtual ruler of Egypt. This would agree with the statement of Herodotus that the brother of Nitocris (Merenre⁶) was king of Egypt, and her marriage to the infant Pepy II⁷ would have given her great power in the country and thus enabled her to avenge the murder of her brother Merenre⁶.

A portrait of Queen Neith is preserved among the sculptures found by Jéquier at Saqqarah, see the figure on p. 54. Above it are four vertical lines of hieroglyphs giving her name and titles; in front of her face is a partly erased cartouche, with, to the right of it, the name Neith. If this group of hieroglyphs is closely scrutinized it will be noticed that it does not appear to have been cut by the same hand as the hieroglyphs in the vertical column above. The sign is differently shaped and is

² 1, 63, 64.
³ According to the epitome of Eusebius the first king of Dyn. 26 was Ammeris, Waddell, op. cit., p. 171.
⁴ Inaros was a son of Psammetichus, a chief of some Libyan tribes to the west of Egypt, cf. Hdt. III, 12 and 15; Thuc. i, 104.
⁵ Hdt. i, 169.
⁶ She was under Merenre, but the title 'King's-Wife', if it existed, is not preserved. Dr. Gardiner has drawn my attention to a fragmentary stela found near Neit's pyramid naming a King's eldest son (Jéquier, op. cit. 55, fig. 32) which I had overlooked. I suggest that this monument must have been sculptured before he came to the throne, for the nomen is not in a cartouche.
⁷ It is known that Pepy II was an infant when he came to the throne. The Turin Papyrus gives him 90+? years; Manetho (Waddell, op. cit., p. 53) says Phiops (Pepy II) began to reign at the age of six and continued till his hundredth year.
without the details of the cord binding the two bows, as will be seen from the figure below. It is, moreover, remarkable that the queen's name is given twice in the same scene, first above her head and then again in front of her face. The cartouche appears to be cut on a slightly lower surface of the wall than the vertical columns above; it has been partly defaced but is clearly recognizable. In the photograph reproduced in pl. 5 of Jéquier's book (which is much better than the outline drawing in pl. 4) I think that I can see traces of the upper corner of a sign below the . If these slight traces could be confirmed by an inspection of the slab, the cartouche would read MenkarEc, which is No. 41 of the Abydos List and follows the otherwise unknown NeterkarEc. If the cartouche had been NeferkarEc, why should it have been partially defaced? If the inscription had given the title of the queen it would have been written with the king's prenomen followed by the name of his pyramid and 'King's-Wife', for this was the customary way of writing the title in the latter part of the Sixth Dynasty. In my view it is much more probable that the partly erased cartouche and the duplication of the queen's name were carved when Neith became virtual ruler of Egypt at the time of Pepy II's infancy, and that the cartouche was mutilated at some later period by a priest who regarded her as an illegitimate sovereign. I do not think that the absence of the title 'Daughter of Rē' above the cartouche, or the fact that Neith's name is not enclosed in a cartouche, militates against the view that MenkarEc was the prenomen of the queen, for it is not until the end of the Twelfth Dynasty that we find a royal woman's nomen written in a cartouche. If Neith's prenomen was MenkarEc, this may have been the reason for her having been confused with MenkaurEc (Mycerinus), the builder of the Third Pyramid at Giza, as Lieblein (Recherches sur la Chronologie Égyptienne, 1873, 40) and Petrie (Hist. 1, 1894, 195) suggested.

1 In the cartouches of the Old Kingdom no is written under on any contemporary monument.
